

Save 40% of your security team's time;
reduce alerts by 99%

RECO ADDS THE MISSING BUSINESS CONTEXT TO DLP

- Automatic context-based data classification
- Reco adds context to filter DLP false positives
- Free up security teams to focus on incident analysis and remediation

Our mission is to enable secure collaboration at the speed of business.

Only by understanding the complete business context of an interaction, can security analysts identify, interpret, and determine the best way to respond to potential threats.

Reco provides this business context.

CUSTOMER SHOWCASE

- SolarEdge were experiencing thousands of DLP alerts at a time
- Reco seamlessly connected to their network in minutes
- Automatically classified all data by context without having to fine-tune policies
- And filtered out 99% of alerts as false positives
- Allowing their analysts to quickly remediate all open incidents
